Subject: RE: CFAC Background SAP - Responses to EPA Comments

My two cents...

- 1) The response adequately addresses the comment.
- 2) The response provides the requisite detail to support the selection of an N of 10 samples based on a Form I Background Test. This information should be added to the SAP (the comment does not indicate they intend to add this to the SAP). However, there is no discussion of whether an N of 10 samples will be adequate to support a Form 2 Background Test, which is something I also recommended during the call. That being said, Roux could continue with the collection of 10 samples per area provided that they understand they do so at their own peril. It is possible subsequent power calculations may determine the sample size is not adequate to support decision-making (and EPA may require additional background data collection in the future to address this data limitation).
- 3) The response adequately addresses the comment.

- 4) The response adequately addresses the comment.
- 5) The response adequately addresses the comment.

My recommendation is that Mike approve the sampling for tomorrow with the above caveat. Sean – thoughts?
Lynn

Importance: High

Lynn:

Please review, and let me know if Roux's responses are adequate so I can tell Mike. They are hoping to begin sampling tomorrow if Mike approves.

Thanks,
Gunnar

Subject: CFAC Background SAP - Responses to EPA Comments

Mr. Cirian,

On behalf of CFAC, Roux is providing the attached responses to EPA comments on the Background Investigation SAP for the RI/FS. These responses were discussed during our conference call on June 1, 2018.

In accordance with the project schedule, we planned to start the surface water sampling scope tomorrow during the current high water season. Therefore, we are requesting conditional approval to proceed with the background surface water sampling scope. We understand that additional comments related to background scope are still being prepared.

Please feel free to contact me if you have any questions regarding this submittal.
